

CloudAdopt Powered by Nulia

CloudAdopt Powered by Nulia Works is a Digital Enablement solution that is platform-based and supports a continuous system of measurement, personalization, and engagement to drive Microsoft 365 skills development.

Nulia Works was purposefully built to unlock the value and enable the promise of Microsoft 365 based on three core pillars:

Measure & Evaluate – Powered by Data Intelligence

Tracks progress on Skills and Outcomes, providing personalized and organizational analyses of usage

Captures users’ unique needs based on actual measurable behaviors

Provides progressive levels of digital maturity: User, Producer, & Master. Every user, based on their depth of knowledge, frequency of use, and their role in the company, can achieve the digital maturity level that is right for them

Personalize & Guide – Powered by AI, ML, and Bots

View full skills development overviews with targeted recommendations based on profiles and persona

Captures users’ unique needs based on actual measurable behaviors

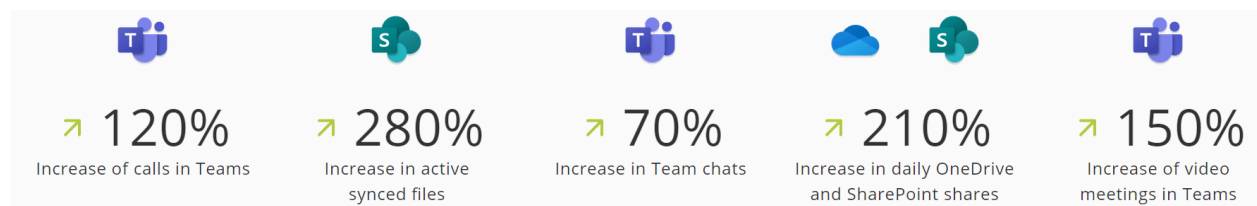

Always on 24/7 engagement that meets users where they are, with what they need

Engage & Reward – Powered by Experience Engine

Motivates users to participate in the digital enablement process by unlocking achievements and achieving measurable Outcomes

Provides support and encouragement that makes enablement fun, exciting, and personally rewarding

Users earn industry-recognized badges and certification to continuously verify skills are always up-to-date and in use

Proven Insights

It guides users with data-driven insights and measures success by doing in the natural flow of work, enabling users to continuously attain, maintain, and use digital productivity skills. By applying machine learning and artificial intelligence, the platform personalizes skills development and meets organizations where they are, with what they need.
