

Microsoft 365 Security

Microsoft Security Workshop

Empower and transform your workplace securely with Microsoft 365 Security features!

Cloud Revolution is an expert in driving modern security practices. We provide tools and resources that ensure employees can collaborate effectively and share information securely no matter where they work. We are excited to offer a Microsoft Security Workshop that shows you how to grow your business securely and accelerate your digital transformation journey.

The Microsoft Security Workshop Day is a full day of sessions that helps customers assess their security landscape, address their most pressing security goals and challenges, and provides an immersive experience that brings to life Microsoft's security vision and capabilities. Optional, Threat Check is available to gain visibility to your Microsoft 365 Cloud environment.

- **Security Workshop** – Microsoft Security Overview, Discovery Session. Customer Immersion Experience, next steps and plan
- **Threat Check** – Gain visibility into threats to the customer's Microsoft 365 cloud environment across email, identity, and data.
- **Next Steps and Plan** - provides an **Actionable Roadmap** based on learnings from Threat Check (if desired) and security workshop.

1-day Security Workshop & Threat Check: **\$5,500**

1-day Security Workshop only: **\$2,000**
