

Microsoft Teams CloudDesign

About Us

Cloud Revolution has a team of experts that focus on driving modern workplace transformation. We provide planning, enablement and support services that ensure employees can collaborate effectively and share information securely no matter where they work.

Microsoft Teams CloudDesign Service

Empower and transform your workplace with Microsoft Teams!

We are excited to offer our proven **Microsoft Teams CloudDesign** workshop series that prepares your business for Microsoft Teams and help accelerate your digital transformation journey.

The **Microsoft Teams CloudDesign** service provides the following:

- 4 days of deep Microsoft Teams Design and Planning services that prepare your business and your team for the Microsoft Teams platform
- Sessions include:
 - **Business Case Workshop** - Review business cases for Microsoft Teams and gather feedback from stakeholders
 - **Teams Architecture and Services Integration** - Overview of how Teams works and the various service dependencies from Office 365 and Azure.
 - **Migration Planning and Desktop Clients** - Workshop to cover the various migration methodologies and modes between Skype for Business and Microsoft Teams including desktop client requirements
 - **Meetings** – Overview of Microsoft Teams Meetings, controls, capabilities, and Media Flows
 - **Meeting Rooms, Devices, and Cloud Video Interop** – Review of Teams devices for both personal and meeting use including 3rd party video systems.
 - **Network Planning** - Workshop on Microsoft network requirements and best practices
 - **Security and Governance** - Workshop covering how to secure Microsoft Teams with external participants, Team creation best practices, and information protection
 - **Voice/Calling** – Provide an overview of the calling features in Microsoft Teams
 - **Monitoring architecture and solutioning** - Workshop to cover the tools and processes to properly monitor Microsoft Teams and Office 365 and define organizational requirements
- A Solution Design Document deliverable
- Remote or Onsite delivery options
